

MaestroTec's Mission

MaestroTec's continuing mission is to ensure our client's success through the development and deployment of the best enterprise portfolio management solutions. MaestroTec will provide the best solutions by continually investing in the improvement of our products and services by listening and responding to our clients; and predicting future needs based on industry best practices.

MaestroTec combines nearly three decades of enterprise portfolio management expertise and domain knowledge to deliver a robust, flexible solution. Maestro-EPM incorporates comprehensive and strategic enterprise portfolio management practices to facilitate informed organization decisions that integrate corporate strategy with corporate initiatives.

Our proven technology has demonstrated strategic value to our client base, providing a solution that enabled them to leverage their existing processes and methodologies, resulting in quick adoption of the Maestro-EPM solution. This approach has helped them gain better visibility, establish better control, increase productivity and improve delivery; benefiting all areas of their organizations, financially, as well as strategically.

Today's Competitive Environment

A slowly recovering economy, a more competitive market place, and increased scrutiny of spending have all created a business environment that is forcing executives to look more closely at how and where they are utilizing their human and financial resources. Add to this a heightened regulatory environment (i.e. Sarbanes-Oxley Act, SOP98-1) and companies are faced with the growing need for accurate and timely information to support faster and better decision-making while meeting tougher audit requirements. Enterprise Portfolio Management (EPM) discipline and tools address these demands by providing the infrastructure necessary for companies to better manage their human and financial resources.

Gartner's Response

According to Gartner, Portfolio Management applications optimize service and project delivery by providing, at a minimum, integrated functionality to support project planning, tracking, resource assignment and status reporting. Ultimately, the CXO's are able to improve the return on investment on their portfolio of projects, assets, and resources.

Our Philosophy

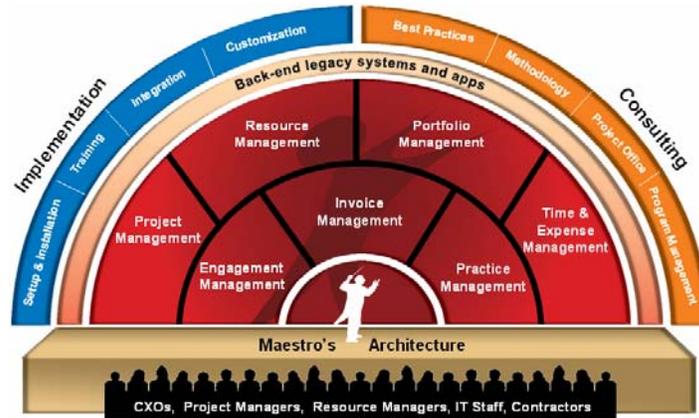

MaestroTec understands that each organization is unique in regards to needs, complexity, and maturity. MaestroTec's approach is to provide our customers a portfolio management solution that fits their situation both functionally and financially. Our modular design and flexible implementation options make this possible.

MaestroTec's products and services are provided to help you and your company get the maximum benefit from its human and capital assets. Combining our consulting services with our product offerings, MaestroTec is ready to work with you to ensure your success.

Maestro-EPM

MaestroTec's Enterprise Portfolio Management solution, our core product, offers several functions that help you control and manage the entire project life cycle from the planning, the initiation, and approval of a request through sophisticated reporting and analysis at the executive levels.

Consulting Services

In addition to our products, MaestroTec and its partners offer consulting services in the following areas:

- Project Portfolio Management
- Program / Project Management
- Process Automation and Integration
- Project Office Establishment & Support
- Productivity Tool Evaluation & Implementation
- Product Development
- Best Practices
- Systems Integration

Implementation

As part of our implementation process, a gap analysis will be performed in conjunction with you, resulting in a customized implementation plan that meets your needs.

Training

A training plan is created to support your situation. Training is provided on-site or remotely via web conferencing and classes are customized based on the types of users to be trained.

Integration Services

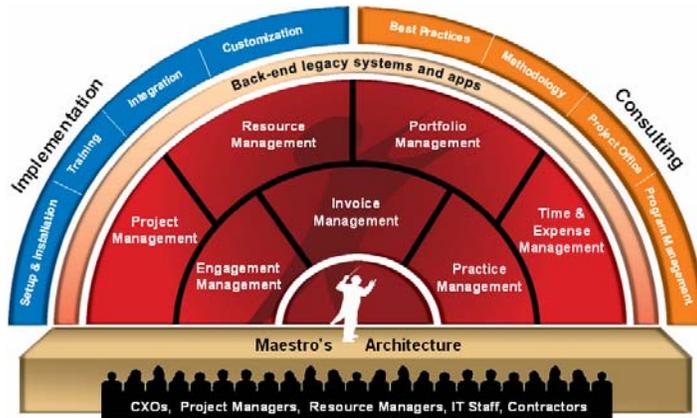

We will work with you to integrate any of our components with your proprietary tools or any other productivity tools that you have implemented. We can help you implement the solution that is designed specifically for your organization's needs, while allowing you the flexibility to keep the products you currently find useful. MaestroTec's modules are designed to integrate easily with other applications and products that you already have in place, reducing overall implementation time and cost. Using XML based interface technology and APIs, we make integration straightforward.

Product Installation

To fit the varying needs of our customers, our products can be installed internally on your intranet or hosted externally as an ASP on our secure server environment. Our 100% web-based products are easy to install and only require Internet Explorer on the client's desktop.

Maestro-EPM, our core product, offers several functions that help you control and manage the entire project life cycle from the planning, the initiation, and approval of a request through project and portfolio reporting and analysis at the executive levels. Maestro-EPM is designed to allow each organization to adapt their methodologies and best practices by integrating them through the use of our customer driven tables.

Maestro-EPM integrates several processes in the life cycle of a project or engagement and stores the underlying data in a central repository for easy access within the application or externally through many industry-wide reporting and analysis tools.

Portfolio Management manages your entire portfolio of projects. It helps you align initiatives with business goals and performs resource forecasting, risk analysis, project analysis and selection.

Project Management monitors project delivery and budgeting—engagement length, project scheduling, staffing, cost analysis, and quality control. Optionally, you can also import and export files between MS Project and Maestro-EPM.

Resource Management assigns and manages resources for various projects—resource scheduling, forecasting, skills assessment, allocation, resource search and utilization.

Time and Expense Management manages costs associated with engagements—email notifications, workflow approvals and multiple viewing and data entry options.

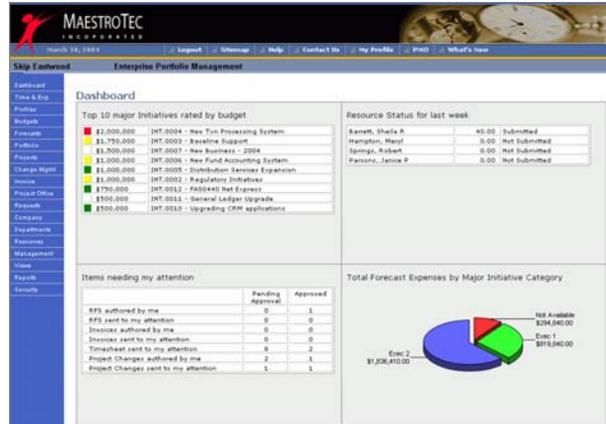

Engagement Management improves project communication and manages staffing requirements, planning and scheduling, deliverables, engagement length, and change orders.

Invoice Management handles invoice creation, billing periods and rates, real-time online status checking, and integration with back-office financials.

Practice Management manages practice operations and planning—best practices, cost analysis, revenue recognition, forecasting, time and expense approval, budgeting, estimating, and e-procurement.

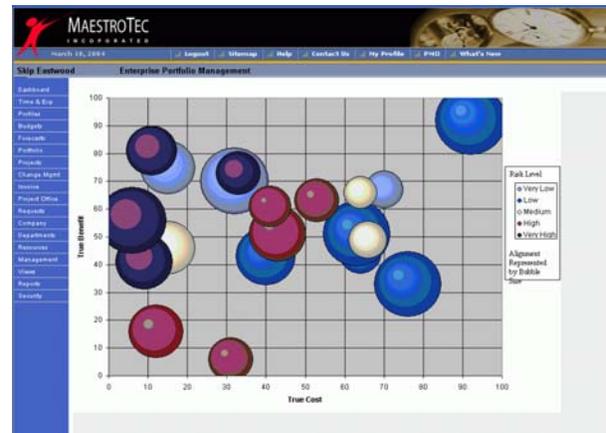

Executive Dashboard

- Centralized access to business critical information
- Analytic perspective of project pipe line
- Drill down capabilities for supporting data

Portfolio Views / Analysis

- Display linked projects with major initiatives
- Create portfolio groups for consolidated views
- Analyze portfolio return on investment
- Track actual figures vs. forecast

Programs / Projects

- Establish major initiatives at the enterprise level
- Align with corporate strategy and governance goals
- Roll up individual projects for senior level reporting
- Bi-directional integration with MS Project
- Create high-level Gantt charts of your major initiatives
